

# CHRONOLOGICAL IST TRADE SCHEDULE

**Timezone Mapping:** Indian Standard Time (IST = UTC+5:30)

This document serves as the canonical chronological trade schedule for all **11 active setups** in `server/trading/config/PairConfig.ts`. Timestamps represent **ORB Range Completion** (when trade scanning & execution active window begins).

## Daily Chronological Trade Schedule (24-Hour Timeline)

| IST Trade Start (ORB Complete) | Session  | Symbol | Bot  | Strategy Type   | ORB Duration | Action Window | Stop Loss Bounds | Risk Sizing | Toxic Hours (Blocked)      | Toxic Days (Blocked) | Toxic Months (Blocked) |
|--------------------------------|----------|--------|------|-----------------|--------------|---------------|------------------|-------------|----------------------------|----------------------|------------------------|
| 04:01 AM IST                   | asia     | NZDUSD | Sage | Liquidity Sweep | 30 Mins      | 30 Mins       | 15 – 80 pips     | 8.2%        | None                       | None                 | None                   |
| 05:46 AM IST                   | asia     | USDCHF | Sage | Liquidity Sweep | 15 Mins      | 15 Mins       | 20 – 35 pips     | 6.0%        | None                       | Monday               | None                   |
